

Side By Side Documentary DVD now available

www.zontaredcliffe.org.au/wp/sidebyside

Side by Side is a much-needed resource for **Breast Cancer** and is unlike any other film in the country.

“Side by Side” differs in that it comprehensively covers all stages of the breast cancer journey and doesn’t just focus on one aspect of treatment,” Jayne Coe (our Narrator) said.

Often when someone is diagnosed with breast cancer, everything happens so quickly they don’t have time to catch their breath, and they rarely know what’s going to happen to them or where to get support. This film is a roadmap to that support.

It provides a very non-clinical, guided tour of the host of services, resources and people that are out there to help support the patient along their individual breast cancer journey.

And it’s a journey that certainly should not be travelled alone. There are plenty of people who can be by your side.
